

Scope of Practice for Health Promotions Interns

Department of Preventive Medicine/Wellness Center

1. Health promotions interns will assist the health promotions coordinator in planning health fairs
2. The intern will assist the coordinator in creating health education display boards
3. The intern will create a power point class presentation and present it at one of the classes normally presented by the Wellness staff, i.e. The Pregnant Soldier education class or the Ready to quit Tobacco class.
4. The intern will be trained to assist with Cholesterol counseling at the Retiree Appreciation Day fair.
5. The intern will assist in implementing the Community needs assessment (already in progress) by Community health services.
6. The intern will be taught how to obtain Carbon Monoxide readings (breathalyzer), for the Tobacco cessation program.
7. The intern will be tasked to create a health promotions activity independently and implement it with the assistance of the Wellness staff.
8. The health promotions intern will not perform any invasive testing including: fingerstick testing for cholesterol or blood pressure monitoring.
9. The student will not be requested to perform any activity above their scope of practice.
